

COIL WEIGHT

- More weight than standard pivot drop weights
1.25 pounds (0.57 kg)
- Save a fitting with integrated Hose Barb x $\frac{3}{4}$ "
MNPT connections
- Hidden from theft - no shiny metal!

The new in-line coil weight is for use with 3000 Series & 3030 Series Sprinklers. This low profile weight fits directly into a flexible drop hose secured with a clamp, above a Nelson regulator and/or sprinkler. This includes the plastic cover versions of the 03000 and 03030 at 6, 10 or 15 psi (0.4, 0.7 or 1 bar) where the regulator must be installed directly onto the coil weight.
