TERRITORY MANAGER SPOTLIGHT

Corbett Falgout

Corbett Falgout joined the sales and marketing group at Nelson Irrigation as a Rotator® Solid Set/Nursery Specialist. Corbett has a Bachelor of Science Degree in Plant and Soil Systems from the Louisiana State University College of Agriculture. He has worked in the irrigation industry for 26 years.

He has extensive experience serving nursery and greenhouse markets across the US and will further Nelson's commitment to providing, and properly applying, the industry's best line of full coverage products. Corbett's long and varied career makes him uniquely qualified to strengthen our position across all product lines.

He will be based out of Clermont, Florida and will work closely with Nelson Territory Managers to provide support to dealers and growers throughout the Eastern US.

Favorite Nelson Products: Solid Set R2000WF, R33, S10, Mechanical Move 3030 Series, Rotator, Accelerator, Orbitor, Valve series

WHERE DO YOU SEE NELSON GOING IN THE FUTURE?

CONTINUING TO BE THE LEADER IN THE MECHANICAL MOVE IRRIGATION INDUSTRY, DUST CONTROL BIG GUNS, CONTROL VALVES, R2000WF IN ROW CROP, UNDER TREE APPLICATIONS. BUILDING MARKET SHARE IN THE SOLID SET NURSERY MARKET.

Year Founded

1998

Number of
Sprinklers Used

33,000+/-

Primary Crops

**Onions, Carrots,
Baby Leafs**

**FEATURED FARM: VEGPRO
QUEBEC & BC, CANADA: SUMMER GROWING
FLORIDA, USA: WINTER GROWING**

“**VEGPRO WAS FOUNDED IN 1998 LOCATED IN QUEBEC CANADA. THEY HAVE SINCE EXPANDED OPERATIONS TO BRITISH COLUMBIA CANADA AND FLORIDA USA. THEY ARE NOW RECOGNIZED AS ONE OF THE LEADING VEGETABLE PRODUCERS IN CANADA.**”

Gold, Red, Green & Purple Plates

50 PSI

“IRRIGATION FOR US, IS A VERY CRITICAL COMPONENT.”

simulation database directly from Nelson. This database was very helpful to make his final choice as it assessed the performance of sprinklers in real conditions such as wind and pressure.

THE NELSON TEAM HAD THE AWESOME OPPORTUNITY TO VISIT THE FLORIDA FARM TO SEE THE R2000WF IN ACTION AND LEARN MORE ABOUT HOW IT BECAME THEIR SPRINKLER OF CHOICE FOR ALL THREE FARMING LOCATIONS. HERE IS WHAT THEY HAD TO SAY.

In 2017-2018 we acquired a new farm in British Columbia, Canada and soon realized our irrigation system was not well adapted to this new location and our growing needs.

In 2019 our engineer Patrick Ramsay while designing a solid set irrigation system for the farm was also researching the best sprinkler for the job. He obtained a lot of information on products from many distributors which led him to discover the Nelson product line.

When he was reviewing the technical performance of different sprinklers, he also gained access to a sprinkler

At the beginning of 2020, the system was operational in BC and we initiated trials with Nelson sprinklers in Quebec. After positive trials in Quebec 2020, we converted half of our sprinklers in Florida and completed the transition to the whole farm in 2021.

At this moment we are very happy with the transition to Nelson sprinklers as the overall irrigation performance has much improved on the farm. We hope the longevity of the system will last in time.

Favorite Product: [Nelson R2000WF®](#) and 50 PSI Regulators

PRODUCT SPOTLIGHT: ORBITOR FX

The [O3030 Orbitor FX](#) is the newest addition to Nelson's comprehensive product offering for the global mechanized irrigation market. Introduced for [up-top use in 2020](#), the FX is based off of field-proven, off-axis Orbitor technology and provides a random droplet pattern in a compact low-vibration design.

Nelson launched the original Orbitor product in 2010 and it has quickly proven itself to be the premier off-axis, random droplet sprinkler on the market for growers who prefer using flexible hose drops. The FX provides that same reliable technology for top of pipe (white plate), and now for use on galvanized steel or semi-rigid polyethylene drops with our new black plate.

Engineered for optimal performance at 10PSI (0.7 bar) with low trajectory for effective wind-fighting and reduced mist for excellent efficiency and uniformity. In addition, the FX incorporates the industry-leading 3NV nozzle for quick-change and quick-cleaning performance.
