

# 3030 SERIES

With Multi-Function 3NV Nozzle  
**PRESS, SPIN, CLICK**

Important! Do not leave in off position in freezing conditions.

At the heart of the 3030 Series is the new 3NV Nozzle. Built with the precision accuracy of the 3TN, this innovative dial-nozzle combines multiple functions so you can “micro-manage” your system.

- » Quick-change — push & turn, audible “click”
- » Stainless steel spring for accurate and secure positioning
- » Covers complete nozzle range, using the same numbering and flow rates as the 3TN Nozzle System
- » Same color-codes as 3TN but odd-size nozzles have weather-enduring scalloped edge

EVEN NOZZLE

ODD NOZZLE

Manage your system without ever having to remove a nozzle.

The 3NV nozzle fits all existing sprinkler types: Rotator, Spinner, Accelerator, Sprayhead, Orbitor, Part Circle. Maximize efficiency with the Square Thread fitting.

## Gain Lots, Give up Nothing.

- » **SUPERIOR FLUSHING OPTIONS:** Sequence to work debris through. It's never advised to stick something in a nozzle – the 3NV flushes with a quick and simple turn of the nozzle. No tools necessary.
- » **“ON” AND “OFF” CAN BE SELECTIVE:** If you're overwatering, or if you need to conserve water for a time, simply select the sprinklers you want to turn off. Consider the cost savings of having a built-in ball valve on every sprinkler!

## For new systems ...

### SPRINKLER PACKAGE INSTALLATION ENHANCEMENTS

- » Maximize efficiency & accuracy — install sprinklers, then walk the line and install nozzles.
- » Lugs on end of nozzle are sized & shaped to allow only correct installation and removal.
- » Visually identify sprinkler modes for quality assurance.
- » Use flush function as needed depending on water quality.

## ... or seamless integration into existing systems.

### COST & TIME SAVING

- » To gain the benefits of the new 3030 Series you simply need a new Nozzle & Body. Existing 3000 Series Cap, Plate, Regulator & Fittings integrate entirely. (NOTE: Orbitor weight can be re-used but need new body/plate.)
- » Since On, Off & Flush functions all take place without removing the nozzle, no more dropped or lost nozzles in the field!
- » A 3NV Dual Nozzle clip (with Hi-Flo, Lo-Flo differentiation) helps farmers adapt to differing watering needs (such as crop establishment, chemigation or lowering water tables).
