

OVERVIEW OF COMMON SOLENOIDS

3-Way Normally Open (except where noted)

See *page 2* for complete specifications

See *page 3* for additional, special order models

12 VDC Latch

Model #	Manuf.	Orifice (mm)	Electrical Conn.	Max psi	Common Usage
E02	NELSON	2.0	1/2" MNPT w/ Leads	175	Robust for TWIG systems
E23	BACCARA	1.2	12" Leads	175	Economical for TWIG systems (2-3")
E29	NETAFIM	2.0	47" Leads	140	For TWIG systems

24 VAC

Model #	Manuf.	Orifice (mm)	Electrical Conn.	Max psi	Common Usage
E40	GEM-SOL	1.6	1/2" FNPT w/ Leads	175	Long wire runs, 50/60 Hz.
E41	PARKER	1.6 / 1.2	1/2" FNPT w/ Leads	175	Robust, high amps
E43	BACCARA	1.2	12" Leads	175	Economical
E46	GEM-SOL	1.6	1/2" FNPT w/ Leads	175	Short wire runs. 60 Hz.

12 VDC

Model #	Manuf.	Orifice (mm)	Electrical Conn.	Max psi	Common Usage
E11	GEM-SOL	1.6	1/2" FNPT w/ Leads	175	Normally Closed for PSNO (2-4")
E21	PARKER	1.6 / 1.2	1/2" FNPT w/ Leads	175	Robust, for non-PSNO applications
E25	SOLENOID SOLUTIONS	3.2	1/2" FNPT w/ Leads	150	Normally Closed for PSNO (6-8")

110-120 VAC

Model #	Manuf.	Orifice (mm)	Electrical Conn.	Max psi	Common Usage
E50	PARKER	1.6 / 1.2	1/2" FNPT w/ Leads	175	Pivot Point, standard. 50/60 Hz
E52	PARKER	3.2	1/2" FNPT w/ Leads	175	Pivot Point, faster response (6-8"). 50/60 Hz
E53	GEM-SOL	1.6	1/2" FNPT w/ Leads	175	Pivot Point, economical. 60 Hz

24 VDC

Model #	Manuf.	Orifice (mm)	Electrical Conn.	Max psi	Common Usage
E30	PARKER	1.6 / 1.2	1/2" FNPT w/ Leads	175	Robust 24VDC
E34	BACCARA	1.2	12" Leads	175	Economical 24VDC (2-4")

Normally Closed Solenoids

For normally open valve applications (e.g. PSNO)

Model #	Manuf.	Voltage	Orifice (mm)	Max psi	Common Usage
E11	GEM-SOL	12 VDC	1.6	175	PSNO valves (2-4")
E25	SOLENOID SOLUTIONS	12 VDC	3.2	150	PSNO valves (6-8")

Window+ Controllers

Model #	Manuf.	Orifice (mm)	Electrical Conn.	Max psi	Common Usage
E20	GEM-SOL	1.6	Window+	175	Robust for 2-8"
E31	BACCARA	1.2	Window+	175	For 2-4"

NOTE:

Orifice size affects the valve opening/closing speed (e.g. smaller orifice results in slower response).

STANDARD SOLENOIDS

Specifications

3-Way Normally Open (except where noted)

NOTES:

- Normally Closed.
- Was "E20-1" prior to June 2019.
- Was "E33-1" prior to June 2019.
- If the solenoid contains a diode, the resistance reading obtained using a voltmeter will be inaccurate (extremely high). This is because a diode acts like a check valve that only opens when a sufficient amount of "pressure" (voltage) is present. Used in low-wattage solenoids to allow longer wire runs, but may not be compatible with some controllers.
- Orifice size affects the valve opening/closing speed (e.g. smaller orifice results in slower response).
- Replacement coils for "Solenoid Solutions" brand order #7510-137.
- Base only part #7510-252.
- Adaptable to 4mm (for fast response) by removing common port restrictor.
- Window+ Controller with solenoid. Window+ Controller only = #11222.
- Pulse width 60 msec.
- Pulse width 25-50 msec.

SPECIAL ORDER SOLENOIDS

Specifications

3-Way Normally Open (except where noted)

These solenoids are special request only and may require longer lead times. Pricing is subject to change. Recommended to substitute for one of the standard options if possible (page 2).

Model #	Manuf.	Part Numbers			Voltage	In-rush Amps	Hold-ing Amps	Ohm	Watts	Orifice ² (mm)	Electrical Conn.	Max psi	Common Usage

E72	PARKER	8925-026 / -	7510-035	7510-135	480 VAC	0.2	0.08			3.2	1/2" FNPT w/Leads	175	Fast response for 6-8"
E80	MAD-TAKIN	9335-001 / -	see page 12	-	-	-	-	-	-	-	-		Hydraulic relay

NOTES:

1. Normally Closed.
2. Orifice size affects the valve opening/closing speed (e.g. smaller orifice results in slower response).
3. If the solenoid contains a diode, the resistance reading obtained using a voltmeter will be inaccurate (extremely high). This is because a diode acts like a check valve that only opens when a sufficient amount of "pressure" (voltage) is present. Used in low-wattage solenoids to allow longer wire runs, but may not be compatible with some controllers.
4. Solenoid actuated hydraulic relay also requires a minimum of 10 psi when the system is off in order to stay closed. If there is less than 10 psi, upstream water will leak out the vent port. Thus, it should not be used immediately downstream of sand media filter stations where the tanks could drain out when the system is off.
5. See page 6 for details.
6. Pulse width 80-500 msec.

DISCONTINUED SOLENOIDS

Specifications

3-Way Normally Open (except where noted)

These solenoids are in the process of being discontinued - no or limited inventory remains. Contact factory for additional information.
